ABSTRACT

Bottom Ash Handling CCR Solutions

As coal fired power plants struggle to understand their options for CCR handling. Bottom ash handling solutions and ash pond elimination are becoming a new challenge to overcome. In this session we will examine the options available to handle bottom ash as well as examining a successful wet to dry conversion of two 650 MW bottom ash systems. The presenter will outline a completely dry bottom ash system, providing; Project Drivers & Benefits, Design Parameters and Concept, Basic Construction Schedule, Key Equipment, Shop Testing, Site Construction Photos and a Project Update.
